WHAT WE DO

PAV Ridesharing Service

SpaceT is aiming to start a PAV Ridesharing Service on Jeju Island in 2023 and is also planning to expand its services to major cities in Asia.

We will cooperate with governments, local authorities, and other PAV/air mobility providers to extend our Ridesharing Service to global customers.

Vertiport Development

SpaceT not only designs and establishes Personal Air Vehicles and Air Mobility Vertiports but also maintains and manages them so there is no need to look further for a Total Service Provider.

By utilizing our network of global leaders for designing and establishing Air Mobility Vertiports, we will create a new type of Vertiport and become a pioneer of the Aerial Lifestyle of the next generation.

WHO WE ARE

SpaceT is all about PAV Ridesharing Service, Personal Air Vehicles and Air Mobility Vertiports. We go from designing and establishing them to maintaining and managing them.

If you are international PAV users or Air Mobility firms, we are your number one stop for a safe and efficient PAV Ridesharing and Vertiport Service.

From this foundation, we are looking to build the future of Aerial Lifestyle.
